SUMMARY

I am a software developer transitioning out of a career in restaurants. I especially enjoy problem solving in code, and I love helping my peers solve bug issues.

TECHNICAL SKILLS

Proficient	Developing
JavaScript	Angular.js
Node.js and Express	React.js
Unit Testing	Html5 and CSS
Mongo DB	Java

PROJECTS

Crave, Aug 2015, github.com/craved/crave

- Web application where users can search for the best place to get a specified dish
- Built a REST API using Express and Mongoose
- Utilized Yelp API to enhance user experience and increase data accuracy
- Constructed a single-page style front-end using Angular
- Assisted with CSS styling

EventFunder, Jul 2015, github.com/EventFunder/event-funder

- Web application that allows users to host events and share costs with friends
- Create a server with a REST API using Express
- Designed database schemas for Mongo DB utilization with Mongoose
- Implemented authentication with JSON Web Token and Bcrypt

Descent 2^e Campaign Tracker Android App, Mar 2015

play.google.com/store/apps/details?id=com.affinitgames.descentcampaigntracker

- Companion app to the board game Descent 2nd Edition
- Independently built and published this application in order to explore Java concepts
- Utilized Android SDK and tools including Google Play Services and AdMob
